Lecture on “How to Publish book”

Name of the Activity:- Lecture on “How to Publish book”

Nature of Activity: Offline

Duration with Date- 01/01/2020

Number of Students participated: -64

Contact details of the teachers/ agencies involved: Asst. Prof. Dipak Khakal-9850191780

Our Shri Martand Bhairav Adhyapak Mahavidyalaya has organised lecture on “How to Publish book” on 1/ 1/2020

The happiness gained through writing and publishing a book is undefinable. Asst. Prof. Dipak Khakal sir guided us about book publish. He explained the following Steps to Self-Publishing a Book 1. Writing. 2. Book Editing. 3. Book Design. 4. Book Metadata. 5. Publishing. 6. Distribution. 7. Marketing.

Now Publishing has become more manageable with the assistance of digital technology. With the help of a computer with an Internet connection, the author alone can manage all the publishing processes. All the processes, from manuscript preparation to delivering books to readers worldwide, are possible using a computer. Many services and tools are available that are helpful for writers to publish books at a faster pace than

using the traditional publishing method. Traditional publishing methods are not able to meet the publishing requirements of the academic and research community. Traditional publishing practices and current copyright laws have a role in disrupting the free exchange of knowledge. Unfavorable copyright terms and conditions for the readers also affect the book's popularity. This lecture imparts the skill sets required for book publishing for the academic community and authors. The lecture gives precise guidelines for Students who wish to write and self-publish books. introduction was given by Principal Dr. Sunita Bhore maam, anchoring was done by prof. Swati Dharmadhikari

Lecture on “How to Select Research topic”

Name of the Activity :- Lecture on “How to Select Research topic ”

Nature of Activity: Offline

Duration with Date- 06/05/2023

Number of Students participated: 32

Contact details of the teachers/ agencies involved: Asst. Prof. Devdatta Rashinkar - 9049017461

Our Shri Martand Bhairav Adhyapak Mahavidyalay has organised lecture on “How to Select Research topic” on 6/5/2023

Here are some things to consider:

1. Make sure your topic meets the assignment requirements. Ask your professor for feedback if you are unsure.
2. Choose a topic that is interesting to you. It may seem obvious, but this will make the research process more fun and engaging for you.
3. Consider the scope of your topic.

Choosing the right research topic is one of the most important decisions a student should make during his/her academic career. Writing an academic paper necessitates a certain set of skills and inclinations. The most difficult component of a good master’s program is finding the right approach and dedication to produce a contemporary relevant piece of research.

Keep your research topic:

- Original
- Inventive and intriguing
- Recent and timely
- Suit your specific interests
- Ignite your curiosity for research

You can usually build your study topic in one of two ways:

- Make a unique study subject suggestion. This is the most prevalent option in the humanities, business, and law fields of study.
- A supervisor will give you a selection of available study topics. This option isn't always available, but in science and engineering, it's the most prevalent.

Early on, talk to a possible supervisor about your ideas. They'll be guide you with the best possibilities as well as offer advice.

- Consider the following questions: why, who, what, where, and when:
 - **WHY** did you choose the topic? What interests you about it? Do you have any opinion about the issues involved?
 - **WHO** are the sources of information on this topic? Who might publish information about it? Who is affected by the topic? Do you know of organizations or institutions that are connected with the topic?
 - **WHAT** are the most important questions about this topic? Is there a debate regarding the topic? Is there a wide range of subjects and viewpoints to consider?
 - **WHERE** does your topic matter most: at the local, national or international level? Is the topic affecting any specific locations?
 - **WHEN** is/was your topic important? Is this a current issue or one from the past? Do you wish to compare your subject to different eras?
