International Women's Day

Date-8/3/23

International Women's Day is celebrated every year on 8th March. It is a day when women are recognised for their achievements without regard to divisions, whether national, ethnic, linguistic, cultural, economic or political.

Since those early years International Women's Day has assumed a new global dimension for women in developed and developing countries alike.

It is a day when women are recognized for their achievements without regard to divisions, whether national, ethnic, linguistic, cultural, economic or political.

Since those early years, International Women's Day has assumed a new global dimension for women in developed and developing countries alike.

The growing international women's movement, which has been strengthened by four global United Nations women's conferences, has helped make the commemoration a rallying point to build support for women's rights and participation in the political and economic arenas.

International Women's Day is a time to reflect on progress made, to call for change and to celebrate acts of courage and determination by ordinary women, who have played an extraordinary role in the history of their countries and communities.

We believe in the importance of getting women and girls involved in water and sanitation management when it comes to challenging social norms. By making women's voices louder and more articulated and empowering them to make a difference, we are giving them a better chance at improving their reproductive health.

This day was celebrated in our college of education in a very unique way. Dr. gauri Patil and Ms. Asawari joshi gave lecture on Skin care routine as a skin specialist and took zoomba session for health and fitness session respectively.

All staff members were present along with the Prinipal Dr. Sunita Bhore, who welcomed the guests.
